

## **Contents**

---

### **Biotechnology and Genetic Resources**

- 1 Japanese Native *Vigna* Genetic Resources  
Norihiko TOMOOKA, Duncan VAUGHAN, Ru-Qiang XU, Kouichi KASHIWABA and Akito KAGA

### **Agricultural Environment**

- 11 Simultaneous Determination of Transformation Rates of Nitrate in Soil  
Takashi NISHIO, Michio KOMADA, Tomohito ARAO and Tetsuo KANAMORI
- 19 Comparison of the Characteristics and Sex Pheromone of *Etiella behrii* (Zeller), a Newly Identified Pod Borer of Soybean in Indonesia, with *E. zinckenella* (Treit.)  
Makoto HATTORI, Sadao WAKAMURA, Kazunori IGITA, Koji YASUDA and TRIDJAKA

### **Agricultural Engineering**

- 25 Automated Rice Transplanting Operation Using GPS and FOG Sensors  
Yoshisada NAGASAKA, Ken TANIWAKI, Ryuji OTANI and Kazuto SHIGETA

### **Food Technology**

- 31 Dietary Fat-Dependent Changes of Gene Expression in Rat Adipose Tissue  
Yoko TAKAHASHI and Takashi IDE

### **Horticulture**

- 39 Methods of Control of Injury Associated with Continuous Vegetable Cropping in Japan — Crop Rotation and Several Cultural Practices —  
Mitate YAMADA
- 47 Method of Forcing Carnations to Bloom to Meet Special Market Demand  
Hitoshi IMAMURA and Kenichi SUTO
- 53 Effect of Salt and Water Stress on Fruit Quality, Physiological Responses, Macro- and Micro-Element Contents in Leaves of Satsuma Mandarin Trees under Greenhouse Conditions  
Kunihisa MORINAGA and Steve R. SYKES
- 59 Screening of Mulberry Genotypes Suitable for Fruit Production and Development of High-Yielding Strains with Large Fruits  
Akio KOYAMA, Hiroaki YAMANOUCI and Hiroaki MACHII

### **Fisheries**

- 67 Early Life Ecology of Skipjack Tuna, *Katsuwonus pelamis*, Based on Survey Cruises off Palau and Micronesia, 1992–1996  
Toshiyuki TANABE, Miki OGURA and Mio TAKAHASHI
